# about Nauka Publishers

Nauka Publishers is the scientific publishing holding company of key significance in Russia. Nauka Publishers traces its modern history up to 1923 and remains a state-sponsored enterprise. Its historical roots go back to 1727 when the Academic Printing Shop was opened by the decree of Peter the Great to support the newly created Academy of Sciences.

Since the beginning Nauka Publishers fused together three major branches of book industry: publishing, printing, and distribution. This approach made Nauka Publishers the most prominent and renown scientific publisher in Russia and across all post-soviet space.

It this system publishing is carried out by three academic publishing houses each of those has its own line of work supported by professionals in these respective fields.

Nauka Publishers in St. Petersburg mainly cultivates works on Arts, Philosophy and Culture;

Novosibirsk branch is involved with STEM disciplines, having close ties with wide scientific community of Siberia;

Vostochnaya Literatura (separate subdivision) deals only with Eastern Literature;

and Nauka Publishers in Moscow, which if the central unit, is the most diversified of them, publishing books and journals concerning all branches of science, and also many other book series such as Literature Monuments, Scientific books for children and youngsters, and many other.

Printing venue is covered by four printing enterprises located in St. Petersburg, Novosibirsk, Moscow, and Makhachkala.

Distribution of Nauka Publishers books and journals is provided by Akademkniga – publisher's own network of bookshops in major Russian regions.

Upholding the valuable traditions of publishing, Nauka Publishers stands for professionalism, innovative approach and new technologies, supported by its employees known for their professional skills and vast scientific expertise.

Nauka Publishers offers hundreds of books annually, including literary classics, monographs, serial publications, yearbooks, encyclopedias, glossaries, anthologies, etc. It also issues 155 scientific and popular science journals for the Russian Academy of Sciences.

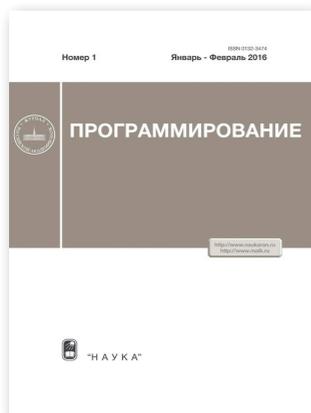

## Matematicheskoe modelirovanie (Mathematical Models and Computer Simulations)

ISSN (print): 0234-0879  
 Founded in: 1989  
 Editor-in-Chief: RAS member B. Chetverushkin  
 Periodicity of issues: 12

The journal carries reviews, original articles and notes devoted to mathematical modeling with the use of computers and numerical methods of solving complicated and topical problems of science and modern technology as well as works demonstrating the possibilities of using computation experiments in a specific area of knowledge, including the setting of tasks, building of mathematical models for them, computation algorithms and packages of applied software for their solution, illustrated calculations, trial of models by comparing them against experimental or theoretical data.

## Programmirovaniye (Programming and Computer Software)

ISSN (print): 0132-3474  
 Founded in: 1975  
 Editor-in-Chief: RAS corresponding member A. Avetisyan, Ph.D.  
 Periodicity of issues: 6

The journal contains articles on all the problems connected with theoretical and practical programming: operational systems, programming technologies, programming languages and compilers, parallel programming, program verification and testing, machine graphics, computer algebra, etc. The journal is aimed at researchers, practical workers, and students.

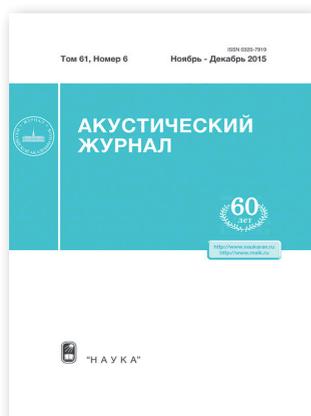

## Zhurnal vyichislitelnoj matematiki i matematicheskoy fiziki (Computational Mathematics and Mathematical Physics)

ISSN (print): 0044-4669  
 Founded in: 1960  
 Editor-in-Chief: RAS member Y. Osipov  
 Periodicity of issues: 12

The journal contains original and review articles on general methods of computational mathematics, approximate and numerical methods of solving the tasks of mechanics, physics, economics, etc., that present mathematical interest as well as theoretical issues of informatics.

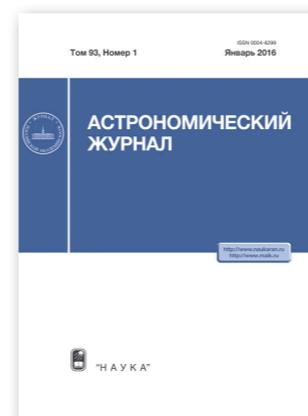

## Akusticheskij zhurnal (Acoustical Physics)

ISSN (print): 0320-7919  
 Founded in: 1955  
 Editor-in-Chief: RAS member O. Rudenko  
 Periodicity of issues: 6

It is the only Russian academic journal in the field of acoustics. The journal publishes scientific reviews, original papers, short communications, letters to the editor, and current events. It covers theoretical and experimental aspects of basic and applied acoustics. This journal presents results of research conducted at the institutes of the Russian Academy of Sciences, at universities, and research establishments in Russia and abroad.

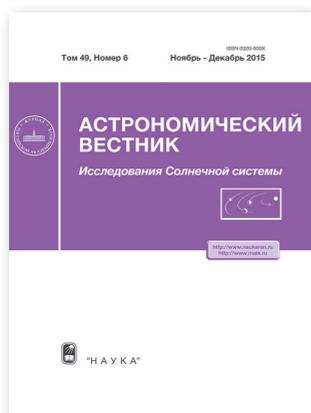

## Astronomicheskij zhurnal (Astronomy Reports)

ISSN (print): 0004-6299  
 Founded in: 1924  
 Editor-in-Chief: RAS corresponding member D. Bisikalo  
 Periodicity of issues: 12

Founded in 1924, the journal is widely known in Russia and frequently cited abroad. Contains articles on astronomy including on theoretical and observation astrophysics, physics of the Sun, planetary astrophysics, radioastronomy, stellar astronomy, celestial mechanics, astronomic methods and instruments as well as chronicles, proceedings of international conferences, and book reviews.

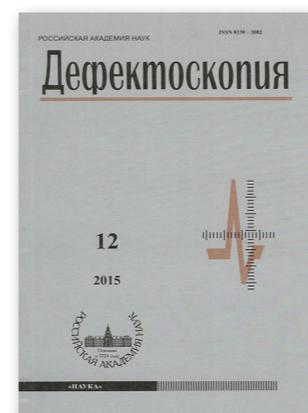

## Astronomicheskij vestnik. Issledovaniya solnechnoj sistemy (Solar System Research)

ISSN (print): 0320-930X  
 Founded in: 1967  
 Editor-in-Chief: RAS member M. Marov  
 Periodicity of issues: 6

Contains articles on the results of space and earth observations and theoretical study of the solar system bodies including their physical nature, movement, internal structure, chemical composition and the properties of the atmosphere and surface, origin, evolution and dynamics as well as works on comparative planetology, cosmochemistry and cosmogony, reviews on the journal's themes, articles on selected theoretical issues connected with the development of models, measuring methodology and techniques, brief announcements.

## Defektoskopiya (Russian Journal of Nondestructive Testing)

ISSN (print): 0130-3082  
 Founded in: 1965  
 Editor-in-Chief: RAS V. Kostin  
 Periodicity of issues: 12

Contains original works on the physical foundations of modern methods and means of non-destructive monitoring and technical diagnostics, new methods and technical means of inspecting various objects and the results of their practical application.

## Fizika i khimiya stekla (Glass Physics and Chemistry)

ISSN (print): 0132-6651  
 Founded in: 1975  
 Editor-in-Chief: RAS member V. Shevchenko  
 Periodicity of issues: 6

Contains articles on inorganic and physical chemistry, including the chemistry of inorganic materials, glass, ceramics, high temperature oxides and coatings, nano-particles, nano-structures, and nano-composites.

## Fizika metallov i metallovedenie (The Physics of Metals and Metallography)

ISSN (print): 0015-3230  
 Founded in: 1955  
 Editor-in-Chief: V. Ustinov  
 Periodicity of issues: 12

Publishes works on experimental and theoretical study of the structure, electrical, magnetic, thermal, optical, mechanical and other properties of metals, metallic alloys and compounds.

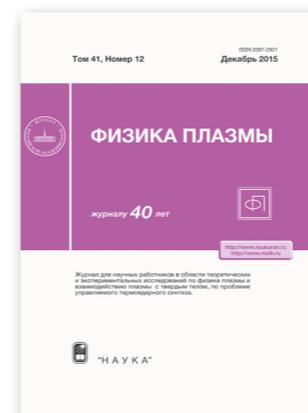

## Fizika i tekhnika poluprovodnikov (Semiconductors)

ISSN (print): 0015-3222  
 Founded in: 1967  
 Editor-in-Chief: R. Suris  
 Periodicity of issues: 12

The journal publishes articles and brief reports on the following areas of semiconductor physics and techniques: amorphous semiconductors, micro- and nano-structures, defects and admixtures, alloying and implantation, radiation effects, epitaxy and thin-film growth, zonal structure of semiconductors, transport phenomena, effects of tunneling, applied aspects of materials study.

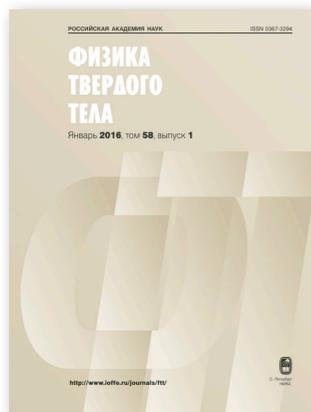

## Fizika plazmy (Plasma Physics Reports)

ISSN (print): 0367-2921  
 Founded in: 1975  
 Editor-in-Chief: RAS member V. Smirnov  
 Periodicity of issues: 12

The range of topics: high temperature plasma physics connected with the problems of controlled nuclear synthesis based on magnetic and inertia localization; cosmic plasma physics including magnetosphere plasma, solar and stellar plasma, etc.; physics of the plasma of gas discharges and plasma generated by laser beams and particle pencils. It also publishes thematic reviews and proceedings of conferences.

## Fizika tverdogo tela (Physics of the Solid State)

ISSN (print): 0367-3294  
 Founded in: 1959  
 Editor-in-Chief: RAS member A. Kaplyansky  
 Periodicity of issues: 12

The journal presents the latest results from Russia's leading researchers in condensed matter physics at the Russian Academy of Sciences and other prestigious institutions and covers all areas of solid state physics including solid state optics, solid state acoustics, electronic and vibrational spectra, phase transitions, ferroelectricity, magnetism, and superconductivity. The journal also presents review papers on the most important problems in solid state physics.

## Geomagnetizm i aeronomiya (Geomagnetism and Aeronomy)

ISSN (print): 0016-7932  
 Founded in: 1961  
 Editor-in-Chief: V. Kuznetsov, Ph.D.  
 Periodicity of issues: 6

The journal covers a wide range of problems of Solar-Earth links: the physics of interplanetary space, cosmic rays, solar wind, interaction of solar wind with magnetic sphere; physical processes in the magnetic sphere and ionosphere, magnetic storms and substorms; physical-chemical processes in the upper and middle atmosphere, impact of solar variability and activity on the processes in the atmosphere and climate; the main geomagnetic field and its age variations; excursions and inversions, active impact on ionospheric and magnetospheric processes on the Sun.

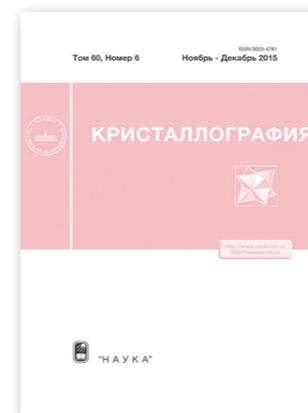

## Izvestiya RAN. Seriya fizicheskaya (Bulletin of the Russian Academy of Sciences: Physics)

ISSN (print): 0367-6765  
 Founded in: 1936  
 Editor-in-Chief: RAS corresponding member D. Khokhlov  
 Periodicity of issues: 12

Founded in 1936 for the express purpose of publishing the best scientific materials reported at conferences and symposia organized by the Presidium and the Physical Sciences Department of the Academy of Sciences. The materials published cover a wide spectrum of physical research.

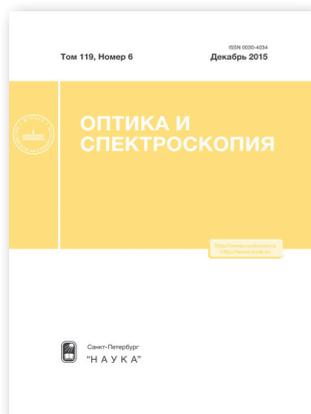

## Kristallografiya (Crystallography Reports)

ISSN (print): 0023-4761  
 Founded in: 1956  
 Editor-in-Chief: M. Kovalchuk  
 Periodicity of issues: 6

The journal publishes original articles, notes and reviews on various aspects of crystallography. The journal contains the following sections: crystallographic symmetry, theory of crystal structures; diffraction and dispersion of ionizing radiation; crystal chemistry; structure of inorganic compounds; structure of organic compounds; structure of macromolecular compounds; physical properties of crystals, liquid crystals, surface and thin films; nanomaterials and ceramics; crystal growth, instruments and apparatuses, software.

## Optika i spektroskopiya (Optics and Spectroscopy)

ISSN (print): 0030-4034  
 Founded in: 1956  
 Editor-in-Chief: RAS member Y. Alexandrov  
 Periodicity of issues: 12

Founded in 1956, the journal publishes original and overview articles on various areas of modern optics and spectroscopy ranging from radio waves to X-rays. The journal covers the problems of theoretical and experimental spectroscopy of atoms, molecules and condensed state, lasers and interaction between laser radiation and substance, physical and geometrical optics, holography and physical principles of designing optical instruments.

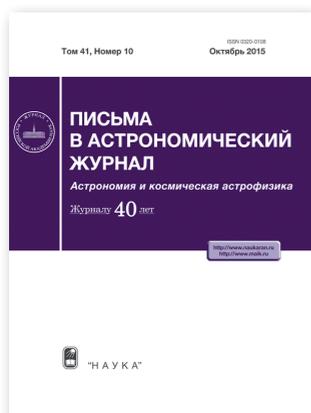

## Pis'ma v zhurnal eksperimentalnoj i teoreticheskoj fiziki (JETP Letters)

ISSN (print): 0370-274X  
 Founded in: 1965  
 Editor-in-Chief: V. Dolgoplov  
 Periodicity of issues: 24

Traditionally the journal publishes the results of original research in all areas of modern astronomy and astrophysics including high-energy astrophysics, cosmology, cosmic astronomy, theoretical astrophysics, radioastronomy, extragalactic astronomy, stellar astronomy and solar system exploration.

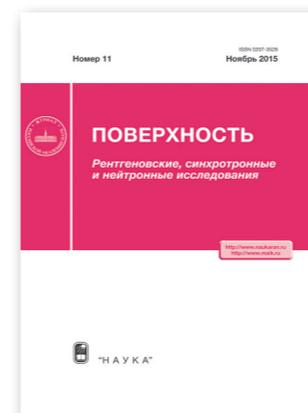

## Pis'ma v astronomicheskij zhurnal (Astronomy Letters)

ISSN (print): 0320-0108  
 Founded in: 1975  
 Editor-in-Chief: R. Syunyayev, Ph.D.  
 Periodicity of issues: 12

The journal publishes articles and notes with the results of original research in all areas of modern astronomy and astrophysics, including high-energy astrophysics, theoretical and relativist astrophysics, cosmology and extra-galactic astronomy, earth and space optical, submillimeter and radioastronomy, physics of the Sun, planets and comets. Research related to new growth areas in astronomy and space astrophysics is given priority.

## Poverhnost. Rentgenovskie, sinhrotronnye i neytronnye issledovaniya (Journal of Surface Investigation. X-Ray, Synchrotron and Neutron Techniques)

ISSN (print): 0207-3528  
 Founded in: 1982  
 Editor-in-Chief: RAS member V. Matveyev  
 Periodicity of issues: 12

The journal publishes original experimental and theoretical articles and overviews of the more relevant problems of solid state physics, study of materials, experiment techniques, condensed environments, nanostructures, study of thin film surfaces and interphase separation boundaries. Particular attention is paid to the use of modern analysis methods. Priority is given to articles and reviews devoted to obtaining and diagnosing new nanomaterials.

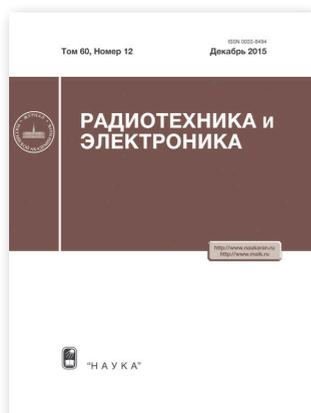

## Pribory i tekhnika eksperimenta (Instruments and Experimental Techniques)

ISSN (print): 0032-8162  
 Founded in: 1956  
 Editor-in-Chief: V. Edelman  
 Periodicity of issues: 6

The journal publishes original reports describing the principles of functioning, structure, application methods or analysis of the operation of various physical instruments and methods of research in all fields of experimental physics, reviews of various aspects of physical measurement, materials of conferences and symposia, commentaries on the content of earlier published articles; brief notices on new physical instruments and materials used in experiments with attached address for request for full information.

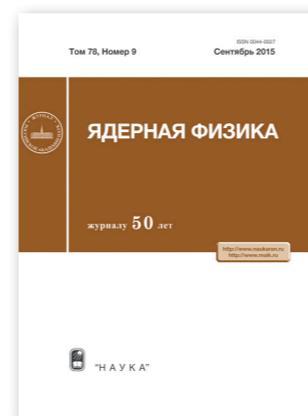

## Radiotekhnika i elektronika (Journal of Communications Technology and Electronics)

ISSN (print): 0033-8494  
 Founded in: 1956  
 Editor-in-Chief: Yu. Gulyaev  
 Periodicity of issues: 12

The journal publishes articles on a wide range of theoretical and applied problems of radioelectronics, communications and physical electronics. The themes cover all the key areas of radioengineering and electronics, such as electrodynamics, radio wave propagation theory, signal processing, transmission lines, communication theory and techniques, physics of semiconductors and physical processes in electronic devices, the use of radioelectronic methods and devices in biology and medicine, microelectronics, nanoelectronics, electronic and ionic emission.

## Yadernaya fizika (Physics of Atomic Nuclei)

ISSN (print): 0044-0027  
 Founded in: 1965  
 Editor-in-Chief: RAS corresponding member O. Dalkarov, Ph.D.  
 Periodicity of issues: 6

The themes of publications include experimental and theoretical investigation of the structure, spectrums and properties of nuclei, radiation, fission and nuclear reactions caused by photons, leptons and hadrons; fundamental interactions and symmetries; collision of particles at high and superhigh energies; calibration and amalgamated quantum field theories, quark models, supersymmetry and supergravitation, also publishes are articles on astrophysics, cosmology, mathematical problems of nuclear physics.

## Zhurnal eksperimentalnoj i teoreticheskoy fiziki (Journal of Experimental and Theoretical Physics)

ISSN (print): 0044-4510  
 Founded in: 1873  
 Editor-in-Chief: RAS member A. Andreyev  
 Periodicity of issues: 12

The journal presents papers emphasizing fundamental theoretical and experimental research in all fields of physics: from solid state to elementary particles and cosmology. Articles are published in all areas of basic and applied physics.

## Zhurnal tehnikeskoy fiziki (Technical Physics)

ISSN (print): 0044-4642  
 Founded in: 1931  
 Editor-in-Chief: RAS corresponding member A. Zbrodsky  
 Periodicity of issues: 12

One of the oldest physical journals in Russia. Founded in 1931. The journal covers all the departments of contemporary applied physics including biomedical areas, research into various materials and structures, development of new instruments and physical experiment methods. "Theoretical and Mathematical Physics" and "Atomic and Molecular Physics" are traditional rubrics.

## Pis'ma v zhurnal tehnikeskoy fiziki (Technical Physics Letters)

ISSN (print): 0320-0116  
 Founded in: 1975  
 Editor-in-Chief: Zh. Alfyorov  
 Periodicity of issues: 24

The journal is an analogue of the American journal *Applied Physics Letters*. The journal is intended for express publication of brief articles on the latest achievements in physics which have technical application potential. Publication in Letters to the Journal of Technical Physics does not rule out, but presupposes publication of extended versions of papers on the same topic both in the *Zhurnal Tehnikeskoy Fiziki* and in corresponding specialized journals.

## Mikroelektronika (Russian Microelectronics)

ISSN (print): 0544-1269  
 Founded in: 1972  
 Editor-in-Chief: RAS member A. Orlikovsky  
 Periodicity of issues: 6

The journal publishes articles on technological, physical and scheme-technical aspects of micro- and nanoelectronics. Special attention is paid to new trends in lithography, etching, alloying, concreting and planarization on the submicronic and nano-meter levels, plasma technologies, molecular beam epitaxy and dry etching as well as methods of study and control of surfaces and multilayer structures. It discusses issues of instrument modeling and diagnosis of technological processes in real time.

## Problemy peredachi informatsii (Problems of Information Transmission)

ISSN (print): 0555-2923  
 Founded in: 1965  
 Editor-in-Chief: L. Bassalygo  
 Periodicity of issues: 4

Founded in 1965, the journal publishes original mathematical articles of a theoretical character and reviews in the following main areas: information theory, encoding theory, signal processing method, theory of automata, big systems, modeling of communication channels, communication network theory, image identification, information in living systems, theory of languages, information protection.

## Avtomatika i telemekhanika (Automation and Remote Control)

ISSN (print): 0005-2310  
 Founded in: 1936  
 Editor-in-Chief: RAS member S. Vasilyev  
 Periodicity of issues: 12

The first journal on control theory in the world. Contains results of research in theory and practice of automatic control, thematic reviews, reports on scientific conferences, materials of scientific discussions, and reviews of new books.

## Izvestiya RAN. Mekhanika tverdogo tela (Mechanics of Solids)

ISSN (print): 0572-3299  
 Founded in: 1961  
 Editor-in-Chief: RAS member D. Klimov  
 Periodicity of issues: 6

The journal publishes articles on the main areas in the study of dynamics of systems of material points and absolutely solid bodies; theory of movement stability and processes of moving object control; theories of gyroscopes and navigation devices; mechanics of deformed bodies, theories of elasticity, plasticity and creep, mechanics of polymers, rocks and heterogeneous solid environments; fundamental theory of mechanics.

## Izvestiya RAN. Energetika (Thermal Engineering)

ISSN (print): 0002-3310  
 Founded in: 1963  
 Editor-in-Chief: RAS member E. Volkov  
 Periodicity of issues: 6

The journal publishes articles on a wide range of basic scientific problems associated with development of power as the technical basis of civilization. Primarily, these articles are devoted to development of one of the largest powers in the world – Power industry of Russia, its Fuel & Power Complex, and Power Engineering Industry. Also it publishes articles on the problems of global, total, nuclear, space power, power economics and ecology, energy policy, electric power, and electric engineering.

## Izvestiya RAN. Mekhanika zhidkosti i gaza (Fluid Dynamics)

ISSN (print): 0568-5281  
 Founded in: 1965  
 Editor-in-Chief: RAS member A. Kulikovskiy  
 Periodicity of issues: 6

The journal publishes theoretical, computational and applied research in the field of aeromechanics, hydrodynamics, plasma dynamics, ground hydrodynamics, biomechanics of continuous bodies. Special attention is paid to new areas of research such as the theory of multiphase flows and their use, chemically reactive flows, flows of liquids and gases in electromagnetic fields, new hydrodynamic methods of increasing oil recovery, new approaches to the description of turbulent currents.

## Izvestiya RAN. Teoriya i sistemy upravleniya (Journal of Computer and Systems Sciences International)

ISSN (print): 0002-3388  
 Founded in: 1963  
 Editor-in-Chief: RAS member Y. Fedosov  
 Periodicity of issues: 6

The journal carries materials on control theory and methods, the study, design, modeling, development and application of new control systems. Special attention is paid to publications on computer methods and technologies (computation algorithms, computer algebra methods), identification of images and processing of images, robotics and microprocessors.

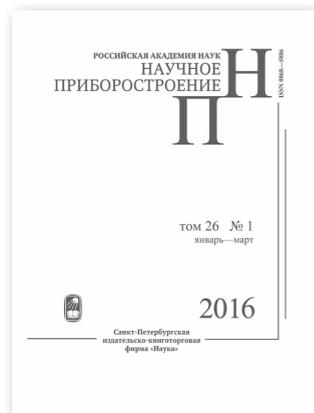

## Prikladnaya matematika i mekhanika (Journal of Applied Mathematics and Mechanics)

ISSN (print): 0032-8235  
 Founded in: 1936  
 Editor-in-Chief: RAS member F. Chernousko  
 Periodicity of issues: 6

The oldest scientific periodical specifically devoted to the problems of mechanics. Traditionally the journal focuses on three areas of mechanics: general mechanics or mechanics of systems including problems of mechanical systems control; liquid and gas mechanics; and mechanics of deformed solid body. It also carries articles on "computational mechanics" and overview articles.

## Nauchnoe priborostroenie (Scientific Instrument Building)

ISSN (print): 0868-5886  
 Founded in: 1991  
 Editor-in-Chief: V. Kurochkin, Ph.D.  
 Periodicity of issues: 4

Founded in 1991, it is a wide-ranging journal covering fundamental and applied problems of instrument building in practically all natural sciences: physics, chemistry, biology, medicine, etc. It is aimed at specialists and the heads of research organizations, higher education institutions, industrial enterprises, researchers, developers, and users of instruments for research in various areas of knowledge.

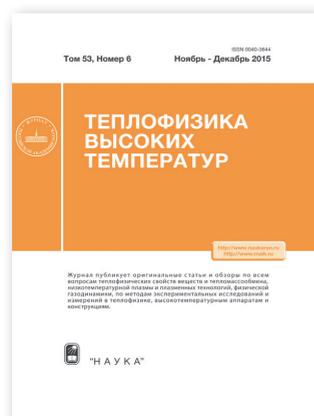

## Problemy mashinostroeniya i nadezhnosti mashin (Journal of Machinery Manufacture and Reliability)

ISSN (print): 0235-7119  
 Founded in: 1965  
 Editor-in-Chief: RAS member R. Ganiyev  
 Periodicity of issues: 6

The journal was founded by the Blagonravov Institute of Machine Study of the RAS. It carries materials on the theory of machine building in general and the study of reliability of machines in particular, as well as articles on the design and improvement of the performance of machines and instruments.

## Теплофизика высоких температур (High Temperature)

ISSN (print): 0040-3644  
 Founded in: 1963  
 Editor-in-Chief: RAS member V. Fortov  
 Periodicity of issues: 6

The journal publishes original articles and reviews on thermodynamic and transport properties of substances (pure substances, mixtures and alloys) including substances in the neighborhood of the critical point and in a state of low temperature plasma, and plasma technologies. Considerable attention is paid to works devoted to building equations of the state of substances, the study of phase equilibrium, heat and mass exchange, boiling, condensation, ray transfer.

## Электрохимия (Russian Journal of Electrochemistry)

ISSN (print): 0424-8570  
 Founded in: 1965  
 Editor-in-Chief: RAS member A. Tsvadze  
 Periodicity of issues: 12

Founded in 1965 on the initiative of Academician A. N. Frumkin. It publishes original articles, reviews, brief notices, letters to the editor, news and reviews of books on all aspects of electrochemistry.

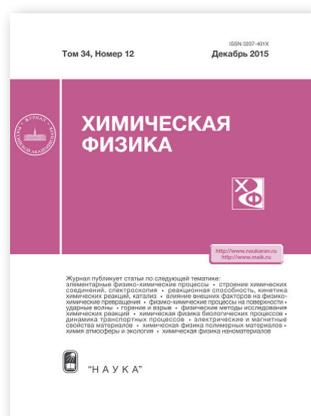

## Физикохимия поверхности и защита материалов (Protection of Metals and Physical Chemistry of Surfaces)

ISSN (print): 0044-1856  
 Founded in: 1965  
 Editor-in-Chief: RAS member A. Tsvadze  
 Periodicity of issues: 6

Published since 1965 (former title "*Metal Protection*"). The journal carries materials on theoretical and applied aspects of physical chemistry of the surface, new materials, their behavior in various conditions and environments, control of their properties, control and protection from degradation and impact on the environment.

## Khimicheskaya fizika (Russian Journal of Physical Chemistry B)

ISSN (print): 0207-401X  
 Founded in: 1982  
 Editor-in-Chief: RAS member A. Buchachenko  
 Periodicity of issues: 12

The journal publishes original and review papers relevant to all aspects of chemical physics. Elementary chemical and physical processes on the molecular level are considered. The dynamics of reactions in gaseous, solid, and liquid phases and on interfaces, including the effect of various impacts – electromagnetic field, radiation, mechanical and thermal factors – is widely discussed. Particular attention is paid to combustion, ignition, and detonation phenomena in gases, two-phase media, and solids, to energy transfer processes in reacting media, and to fluid dynamics of reacting media.

## Khimiya vysokikh energij (High Energy Chemistry)

ISSN (print): 0023-1197  
 Founded in: 1967  
 Editor-in-Chief: M. Alfimov  
 Periodicity of issues: 6

The journal publishes original and survey articles on molecular and supramolecular photochemistry, radiation chemistry, plasma chemistry, nano-sized systems chemistry, new atoms chemistry, processes and materials for optical information systems, scientific foundations of the corresponding technologies, brief announcements, letters to the editor, current news, and reviews of new books on high-energy chemistry.

## Khimiya tverdogo topliva (Solid Fuel Chemistry)

ISSN (print): 0023-1177  
 Founded in: 1967  
 Editor-in-Chief: RAS corresponding member A. Lapidus  
 Periodicity of issues: 6

The journal carries original theoretical and applied articles on chemical and physico-chemical characteristics of solid combustible minerals and solid fuels and hydrocarbon materials obtained from them, breakthrough areas in the processing of combustible fossils to obtain valuable products: high quality solid power generating fuel, components of liquid engine fuels, humous fertilizer.

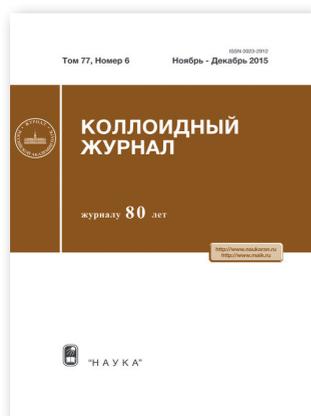

## Kinetika i kataliz (Kinetics and Catalysis)

ISSN (print): 0453-8811  
 Founded in: 1960  
 Editor-in-Chief: RAS member V. Kazansky  
 Periodicity of issues: 6

Founded in 1960, it is currently the only Russian periodical that publishes the results of theoretical and experimental studies in the field of homogeneous and heterogeneous kinetics and catalysis. The topics of the journal cover the mechanisms and kinetics of non-catalytic processes in the gas, liquid and solid phases, photocatalysis, quantum-chemical calculations in the field of kinetics and catalysis, preparation of catalysts, problems of their deactivation; macrokinetics and computer modeling in the field of catalysis.

## Kolloidnyj zhurnal (Colloid Journal)

ISSN (print): 0023-2912  
 Founded in: 1935  
 Editor-in-Chief: A. Rusanov  
 Periodicity of issues: 6

The journal publishes original experimental and theoretical papers and review articles in the field of the sciences of colloids and surface phenomena.

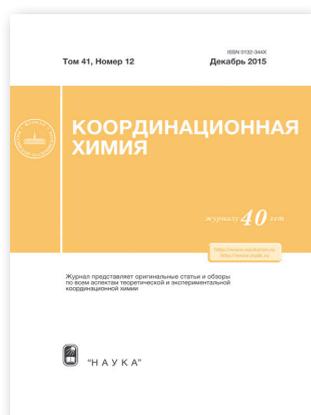

## Neftekhimiya (Petroleum Chemistry)

ISSN (print): 0028-2421  
 Founded in: 1961  
 Editor-in-Chief: RAS member S. Khadzhiyev  
 Periodicity of issues: 6

The journal publishes original articles and reviews of theoretical and experimental studies devoted to the problems of oil chemistry and geochemistry, the processing of oil and gas, including deep processing of oil, processes and catalysts of petrochemical processes, obtaining new petroleum products, including lubricants and additives and environmental protection.

## Koordinatsionnaya khimiya (Russian Journal of Coordination Chemistry)

ISSN (print): 0132-344X  
 Founded in: 1975  
 Editor-in-Chief: RAS member I. Yeremenko  
 Periodicity of issues: 12

*Koordinatsionnaya khimiya* is now one of the most prominent chemical journals in Russia. It presents reviews, original papers, and communications on all aspects of theoretical and experimental coordination chemistry. The materials published in the journal are meant not only for specialists in various fields of pure chemistry, but also for those working in related disciplines, such as chemical engineering, chemical analysis, molecular catalysis, ecology, biology, medicine, agriculture, materials science, hydrometallurgy, and energetics.

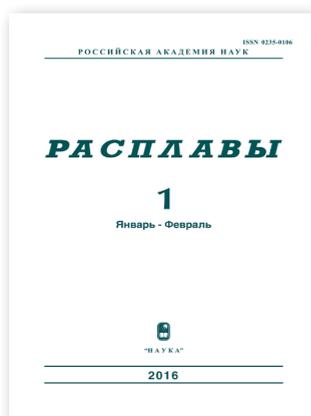

## Radiokhimiya (Radiochemistry)

ISSN (print): 0033-8311  
 Founded in: 1959  
 Editor-in-Chief: RAS member B. Myasoedov  
 Periodicity of issues: 6

Founded in 1959 by the Russian Academy of Sciences and the Khlopin Radium Institute. The journal publishes original and review articles on fundamental nuclear physical properties of radionuclides, chemistry and technology of radioactive elements and isotopes, chemical problems of the nuclear fuel cycle, chemical aspects of nuclear medicine, the behavior of radionuclides in the environment and the handling of radioactive waste.

## Rasplavy (Russian Metallurgy)

ISSN (print): 0235-0106  
 Founded in: 1987  
 Editor-in-Chief: N. Vatolin  
 Periodicity of issues: 6

The journal publishes materials devoted to high temperature physical chemistry and electrochemistry of molten metal, oxide and salts: the results of original theoretical and experimental studies of the structure, physical-chemical properties and thermodynamics of molten masses, the structure of the boundaries of molten mass and solid, liquid and glass phases, processes taking place on these boundaries in the production of ferrous, non-ferrous and rare metals; the results of physical and computer modeling of the structure and properties of liquid and amorphous materials.

## Teoreticheskie osnovy khimicheskoy tekhnologii (Theoretical Foundations of Chemical Engineering)

ISSN (print): 0040-3571  
 Founded in: 1967  
 Editor-in-Chief: N. Kulov  
 Periodicity of issues: 6

The journal publishes works on all areas of chemical technology including transfer and surface phenomena, mixture division processes, theory and methods of calculating chemical reactors, bio- and nano-technology, dispersion systems, intensification methods, modeling and control of chemical-technological processes and systems, problems of reliability and safety of chemical production, energy- and resource saving, ecology.

## Vysokomolekulyarnye soedineniya (Seriya A) (Polymer Science (Series A))

ISSN (print): 2308-1120  
 Founded in: 1959  
 Editor-in-Chief: RAS member A. Khokhlov  
 Periodicity of issues: 6

Contains original articles and reviews of a fundamental character in all areas of the science of polymers that break new ground and present interest for a wide range of readers. It is brought out simultaneously in A, B, and C series in Russian and English. It accepts articles from authors regardless of their place of residence. The A series (Physics of Polymers) carries experimental and theoretical articles and reviews devoted to physical-chemical study of the structure and properties of polymers.

## Vysokomolekulyarnye soedineniya (Seriya B) (Polymer Science (Series B))

ISSN (print): 2308-1139  
 Founded in: 1959  
 Editor-in-Chief: RAS member A. Khokhlov  
 Periodicity of issues: 6

The journal of the Russian Academy of Sciences publishing original articles and reviews of a fundamental character in all cutting-edge areas of the science of polymers that present interest for a wide range of readers. It is brought out simultaneously in A, B, and C series in Russian and English. It accepts articles from authors regardless of their place of residence.

## Vysokomolekulyarnye soedineniya (Seriya C) (Polymer Science (Series C))

ISSN (print): 2308-1147  
 Founded in: 1959  
 Editor-in-Chief: RAS member A. Khokhlov  
 Periodicity of issues: 1

Journal of the Russian Academy of Sciences publishing original articles and reviews of a fundamental character in all cutting-edge areas of the science of polymers that present interest for a wide range of readers. It is brought out simultaneously in A, B, and C series in Russian and English. It accepts articles from authors regardless of their place of residence. Manuscripts are accepted through C Series (Thematic Issues) for one issue every year.

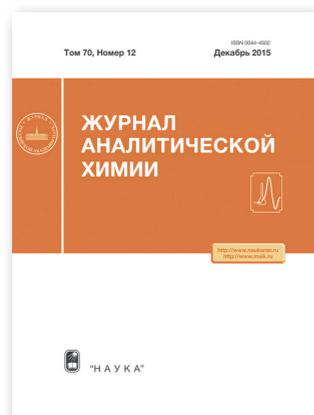

## Zhurnal fizicheskoy khimii (Russian Journal of Physical Chemistry A)

ISSN (print): 0044-4537  
 Founded in: 1930  
 Editor-in-Chief: RAS member V. Lunin  
 Periodicity of issues: 12

The journal publishes theoretical and experimental works on chemical thermodynamics and thermochemistry, biophysical chemistry, photochemistry and magnetochemistry, the structure of materials, quantum chemistry, physical chemistry of nano-materials and solutions, surface phenomena and adsorption, the methods and instruments of physical-chemical research.

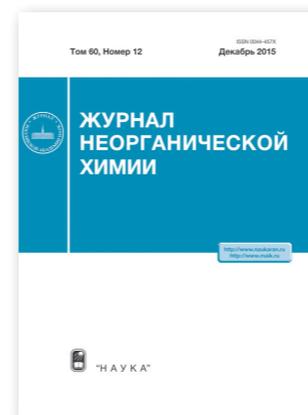

## Zhurnal analiticheskoy khimii (Journal of Analytical Chemistry)

ISSN (print): 0044-4502  
 Founded in: 1946  
 Editor-in-Chief: RAS member Yu. Zolotov  
 Periodicity of issues: 12

The journal carries original articles of a theoretical and experimental character on all aspects of analytical chemistry. Of particular interest are the materials containing the description of new approaches to analysis (instrumental, chemical and biological methods), new detectors and sensors, new methods of preparing samples and data processing. It also publishes articles of a general character, reviews, letters to the editors, consultations, information on laboratories or research personnel, chronicle of conferences, seminars, awards.

## Zhurnal neorganicheskoy khimii (Russian Journal of Inorganic Chemistry)

ISSN (print): 0044-457X  
 Founded in: 1956  
 Editor-in-Chief: N. Kuznetsov  
 Periodicity of issues: 12

Publishes the results of original theoretical and experimental work on the chemistry of inorganic compounds, coordination chemistry, physical-chemical analysis, physical chemistry of solutions, reviews.

### Zhurnal obschej khimii (Russian Journal of General Chemistry)

ISSN (print): 0044-460X  
 Founded in: 1869  
 Editor-in-Chief: RAS member A. Rusanov  
 Periodicity of issues: 12

The journal focuses on new achievements and long-term results in many related disciplines in chemistry, including organometallics, organometalloids, organo-inorganic complexes, mechanochemistry, nanochemistry, and more. The journal publishes reviews, current scientific papers, letters to the editor, discussion papers, book reviews, announcements and reports on scientific conferences. The journal benefits researchers at scientific and research institutes, academics, researchers and students at universities, and specialists in many branches of the chemical industry.

### Zhurnal prikladnoj khimii (russian journal of applied chemistry)

ISSN (print): 0044-4618  
 Founded in: 1928  
 Editor-in-Chief: RAS member S. Ivanchev  
 Periodicity of issues: 12

Founded by the Applied Chemistry Department of the Russian Physical-Chemical Society in 1928. Carries articles and reviews on the results of original scientific and technological research pertaining to various problems of chemistry and chemical technology of an applied character.

### Zhurnal organicheskoi khimii (Russian Journal of Organic Chemistry)

ISSN (print): 0514-4749  
 Founded in: 1965  
 Editor-in-Chief: RAS member I. Beletskaya  
 Periodicity of issues: 12

The journal covers all aspects of modern organic chemistry including organic synthesis, theoretical organic chemistry, structure and mechanism, and the application of organometallic compounds in organic synthesis. The journal is of interest to researchers in both scientific and industrial institutes, as well as for university libraries.

## Agrokhimiya (Agricultural Chemistry)

ISSN (print): 0002-1857  
 Founded in: 1964  
 Editor-in-Chief: RAS corresponding member V. Kudeyarov  
 Periodicity of issues: 12

Carries results of theoretical and experimental research in agrochemistry, plant nutrition, the use of fertilizer, chemical plant protection agents and biologically active substances (growth stimulants, retardants, etc.). Contains the following sections: experimental and methodological articles, reviews, criticism and bibliography, scientific life chronicle.

## Biokhimiya (Biochemistry (Moscow))

ISSN (print): 0320-9725  
 Founded in: 1936  
 Editor-in-Chief: RAS member V. Skulachev  
 Periodicity of issues: 12

The journal includes research papers in all fields of biochemistry as well as biochemical aspects of molecular biology, bio-organic chemistry, microbiology, immunology, physiology, and biomedical sciences. Coverage also extends to: new experimental methods in biochemistry, theoretical contributions of biochemical importance, reviews of contemporary biochemical topics and mini-reviews.

## Biofizika (Biophysics)

ISSN (print): 0006-3029  
 Founded in: 1956  
 Editor-in-Chief: RAS corresponding member Y. Fesenko  
 Periodicity of issues: 6

Contains articles with the results of original experimental and theoretical research, not represented or published in other periodicals as well as reviews commissioned by the editorial board (or proposed by the authors and approved by the editorial board). The main topics are: Molecular Biophysics, Biophysics of the Cell, Biophysics of Complicated Systems. Other sections: Discussions, Chronicle, Reviews, Letters to the Editor. The journal also publishes materials of scientific conferences on the more relevant issues of biophysics.

## Biologicheskie membrany (Biochemistry (Moscow), Supplement Series A: Membrane and Cell Biology)

ISSN (print): 0233-4755  
 Founded in: 1984  
 Editor-in-Chief: S. Kolesnikov, Ph.D.  
 Periodicity of issues: 6

Contains original experimental and theoretical work as well as reviews covering physical-mathematical aspects of membrane and cell biology: molecular mechanisms of membrane transport, receptor systems and intracellular signaling, cell functions and pathologies associated with cell membranes as well as fundamental biomedical research including membrane aspects of physiology, pharmacology and immunology.

## Biologiya morya (Russian Journal of Marine Biology)

ISSN (print): 0134-3475  
 Founded in: 1975  
 Editor-in-Chief: RAS member A. Adrianov  
 Periodicity of issues: 6

Carries articles on various aspects of theoretical and applied marine biology which make a tangible contribution to the study of marine animals and plants as well as articles on practical issues of conservation, rational use and reproduction of marine biological resources, discussion materials, milestones of scientific life, reviews, materials on the history of marine biology, information on the activities of marine biology institutions and prominent scientists.

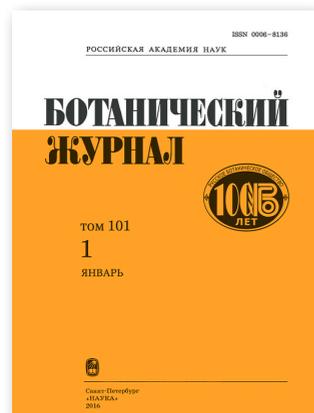

## Ecologiya (Russian Journal of Ecology)

ISSN (print): 0367-0597  
 Founded in: 1970  
 Editor-in-Chief: RAS corresponding member V. Bogdanov  
 Periodicity of issues: 6

International scientific journal which publishes reviews, original articles and notes on completed fundamental research in all areas of theoretical and experimental ecology: ecology of plant, animal and fungi species; study of the structure of the populations of living organisms in various environments; biodiversity and stability of various types of ecosystems, successions, homeostasis, types of intra- and inter-species changes of morphophysiological and cytogenetic indicators.

## Botanicheskij zhurnal (Botanical Journal)

ISSN (print): 0006-8136  
 Founded in: 1916  
 Editor-in-Chief: RAS corresponding member R. Kamelin  
 Periodicity of issues: 12

The journal contains articles on the following themes: anatomy and morphology of plants, evolution of the plant world, systematics and taxonomy of plant species and plant communities, vegetation dynamics in natural and man-made conditions.

## Entomologicheskoe obozrenie (Entomological Review)

ISSN (print): 0367-1445  
 Founded in: 1901  
 Editor-in-Chief: B. Korot'yayev, Ph.D.  
 Periodicity of issues: 4

Journal publishes papers dealing with all aspects of theoretical and applied entomology; and covers systematics, faunistics, zoogeography, evolution, ecology, morphology, physiology of insects, spiders and mites; as well as biological and chemical control of pests.

## Fiziologiya rastenij (Russian Journal of Plant Physiology)

ISSN (print): 0015-3303  
 Founded in: 1954  
 Editor-in-Chief: RAS corresponding member V. Kuznetsov  
 Periodicity of issues: 6

The themes of the articles cover aspects of modern plant physiology as well as related aspects of biophysics, biochemistry, cytology, anatomy, genetics, etc. It publishes experimental and theoretical articles, reviews, brief summaries, and descriptions of new methods of research.

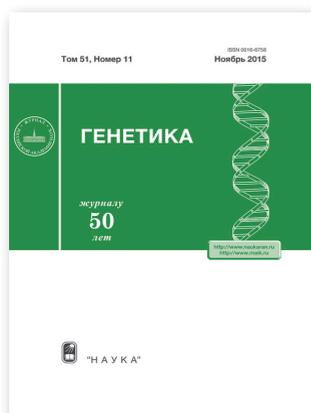

## Izvestiya RAN. Seriya biologicheskaya (Biological Bulletin)

ISSN (print): 0002-3329  
 Founded in: 1936  
 Editor-in-Chief: RAS member V. Rozhnov  
 Periodicity of issues: 6

Interdisciplinary journal on biology. It focuses on fundamental studies in the fields of cell biology, biochemistry, zoology, botany, physiology, and ecology. This journal publishes current materials of experimental studies and surveys on current problems in biology. The editorial board welcomes contributions from foreign authors.

## Genetika (Russian Journal of Genetics)

ISSN (print): 0016-6758  
 Founded in: 1965  
 Editor-in-Chief: RAS corresponding member N. Yankovsky  
 Periodicity of issues: 12

The journal publishes reviews and experimental papers in the areas of theoretical and applied genetics. It presents fundamental research on genetic processes at the molecular, cell, organism, and population levels, including problems of the conservation and rational management of genetic resources and the functional genomics, evolutionary genomics, and medical genetics.

## Lesovedenie (Russian Forest Sciences)

ISSN (print): 0024-1148  
 Founded in: 1967  
 Editor-in-Chief: RAS member A. Isayev  
 Periodicity of issues: 6

The journal publishes the results of fundamental and applied research in the field of forest study and forest ecology, forest typology, functioning, diversity and dynamics of forest ecosystems that lays the theoretical foundation for measures to increase the productivity, optimize forestry, and preserve the biodiversity of forest communities.

## Mikologiya i fitopatologiya (Mycology and Phytopathology)

ISSN (print): 0026-3648  
 Founded in: 1967  
 Editor-in-Chief: A. Kovalenko  
 Periodicity of issues: 6

The journal publishes original works, methodological articles, reviews and discussions, chronicles of all departments of mycology and phytopathology including systematics, ecology, physiology and fungi genetics as well as biotechnology and plant protection.

## Molekulyarnaya biologiya (Molecular Biology)

ISSN (print): 0026-8984  
 Founded in: 1966  
 Editor-in-Chief: RAS member A. Makarov  
 Periodicity of issues: 6

The journal covers the problems of molecular, cell and computer biology, including structural and functional genomics, transcriptomics, proteomics, bioinformatics, biomedicine, molecular enzymology, molecular virology and immunology, theoretical foundations of biotechnology, physics and physical chemistry of proteins and nucleic acids, and touches upon the problems of molecular evolution.

## Mikrobiologiya (Microbiology)

ISSN (print): 0026-3656  
 Founded in: 1932  
 Editor-in-Chief: RAS member M. Ivanov  
 Periodicity of issues: 6

The journal publishes experimental and theoretical articles on a wide range of issues of general and applied microbiology, notes and reviews of the latest achievements in various areas of microbiology, reviews of new books, chronicles of scientific life of the microbiological community.

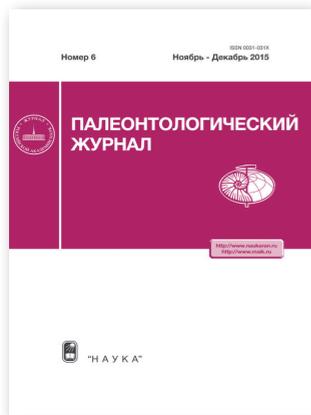

## Ontogenez (Russian Journal of Developmental Biology)

ISSN (print): 0475-1450  
 Founded in: 1970  
 Editor-in-Chief: S. Vasetskij  
 Periodicity of issues: 6

The journal publishes theoretical, review and experimental articles on the mechanisms of development, differentiation and growth in animals and plants. Particular attention is paid to the study of mechanisms of normal and pathological individual development at the molecular, cellular, tissue, and organism levels.

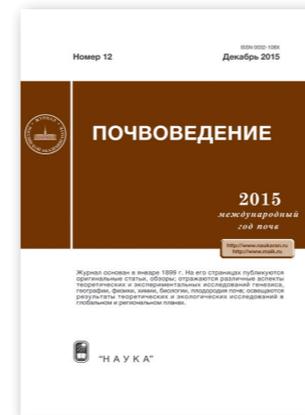

## Paleontologicheskij zhurnal (Paleontological Journal)

ISSN (print): 0031-031X  
 Founded in: 1959  
 Editor-in-Chief: RAS member A. Rozanov  
 Periodicity of issues: 6

The main Russian scientific periodical in the field of paleontology. Publishes original works on anatomy, morphology and taxonomy of fossil organisms, their spread, ecology and origin, evolution of organisms, communities and biosphere and key information on biostratigraphy of the world, especially Eastern Europe and Asia.

## Pochvovedenie (Eurasian Soil Science)

ISSN (print): 0032-180X  
 Founded in: 1899  
 Editor-in-Chief: RAS corresponding member S. Shoba  
 Periodicity of issues: 12

One of the oldest academic journals published since January 1899, it publishes original articles and reviews on various aspects of theoretical and experimental research of the genesis, geography, physics, chemistry, biology and fertility of soils, the results of theoretical and ecological investigations on the global and regional scale.

## Parazitologiya (Parasitology)

ISSN (print): 0031-1847  
 Founded in: 1967  
 Editor-in-Chief: RAS corresponding member O. Pugachev  
 Periodicity of issues: 6

The journal publishes articles on general problems of parasitology, ecology, morphology, systematics and evolution of parasitic animals, including primitive ones, parasite-host relations of living organisms, natural-focal transmissible diseases, and other issues of parasitology.

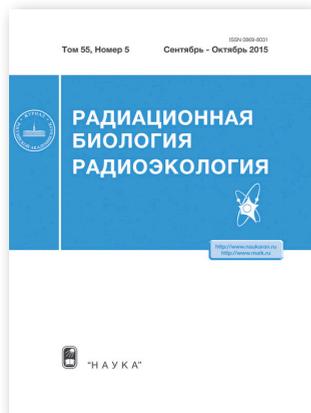

## Prikladnaya biokhimiya i mikrobiologiya (Applied Biochemistry and Microbiology)

ISSN (print): 0555-1099  
 Founded in: 1965  
 Editor-in-Chief: RAS member V. Popov  
 Periodicity of issues: 6

The journal publishes original articles in biochemistry and microbiology of present or potential practical applications. The scope of the journal includes studies of enzymes; mechanisms of enzymatic reactions; biosynthesis and biogenesis of physiologically active compounds and the pathways of their regulation; biocatalysis in organic synthesis; and metabolic engineering. In addition to experimental studies, the journal publishes invited reviews.

### Radiatsionnaya biologiya. Radioekologiya (Radiation Biology. Radioecology)

ISSN (print): 0869-8031  
 Founded in: 1961  
 Editor-in-Chief: A. Rubanovich, Ph.D.  
 Periodicity of issues: 6

The journal publishes the results of the study of the changes under the impact of ionizing and non-ionizing radiation in biomatter at all levels of its organization from the molecular to the ecosystem level; radiation chemistry of biomolecules and biophysics of radiobiological processes; molecular and cell radiobiology; radiation cytogenetics and general genetics; radiation biochemistry, pathophysiology, hematology and pathomorphology of animals and humans exposed to radiation; clinical radiobiology.

### Rastitel'nye resursy (Plant Resources)

ISSN (print): 0033-9946  
 Founded in: 1965  
 Editor-in-Chief: A. Budantsev, Ph.D.  
 Periodicity of issues: 4

Founded in 1965 by the Russian Academy of Sciences Komarov Botanical Institute, the journal is published under the auspices of the RAS Department of Biological Sciences. It carries materials on a wide range of topics: biology and ecology of resource species (including anthropogenic impact), plant resources and problems of their rational use and conservation, components and biological activity of plants.

### Rossiyskij immunologicheskij zhurnal (Russian Journal of Immunology)

ISSN (print): 1028-7221  
 Founded in: 1996  
 Editor-in-Chief: V. Chereshnev  
 Periodicity of issues: 4

The official publication of Russian Society of Immunologists. Carries works devoted to the main problems of fundamental and applied immunology. Its rubrics include: experimental articles, overviews, brief announcements, immunological resources on the Internet (ImmunoWeb), announcements and reports about congresses and conferences and news.

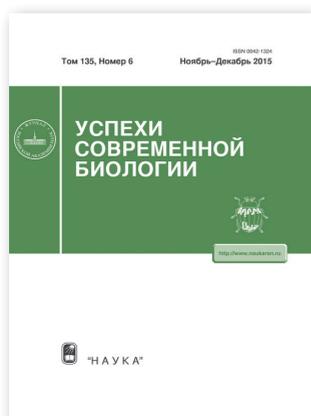

### Tsitologiya (Cell and Tissue Biology)

ISSN (print): 0041-3771  
 Founded in: 1959  
 Editor-in-Chief: RAS member N. Nikolsky  
 Periodicity of issues: 12

Publishes articles on the main departments of cellular biology (morphology, physiology, immunology, genetics, biochemistry, molecular biology, biophysics) carried out on animal and plant cells, review and discussion articles, reports on new methods of investigation, reviews of new books, reports on scientific congresses, conferences, and symposia.

## Uspekhi sovremennoj biologii (Advances in Current Biology)

ISSN (print): 0042-1324  
 Founded in: 1932  
 Editor-in-Chief: RAS corresponding member I. Zakharov-Gezekhus  
 Periodicity of issues: 6

General theoretical survey journal in the field of biological sciences regularly publishing overviews of topical issues in various departments of modern biology. The journal is aimed at scientific workers, i.e. biologists and medical scientists, postgraduate students, university teachers, senior-year biology students.

## Zhurnal obschej biologii (Journal of General Biology)

ISSN (print): 0044-4596  
 Founded in: 1940  
 Editor-in-Chief: RAS corresponding member Y. Kriksunov  
 Periodicity of issues: 6

The journal contains articles on theoretical issues of biology of interest to biologists of every specialty (evolution, ecology, general taxonomy, general cytology, genetics, mechanisms of living organism adjustment to their environment, regularities of organism development, bionics, etc.). In addition to theoretical articles the journal carries reviews of new books by Russian and foreign biologists and information on international congresses and national meetings on key problems of biology.

## Voprosy ikhtiologii (Journal of Ichthyology)

ISSN (print): 0042-8752  
 Founded in: 1953  
 Editor-in-Chief: RAS member D. Pavlov  
 Periodicity of issues: 6

The journal was launched in 1953 as a collections of papers and in 1961 became a periodical. Since that time, it remains the leading Russian journal on ichthyology covering fish ecology, morphology, genetics, physiology, embryology, systematics, and fisheries biology.

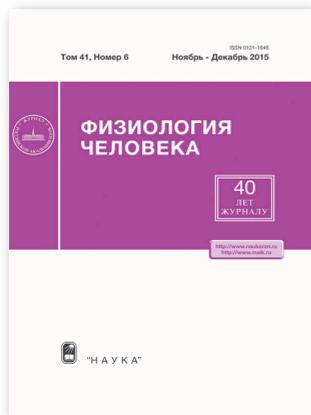

## Zoologicheskij zhurnal (Zoological Journal)

ISSN (print): 0044-5134  
 Founded in: 1916  
 Editor-in-Chief: RAS member Y. Dgebuadze  
 Periodicity of issues: 12

Founded in 1916 on the initiative of Academician A. N. Severtsov, the journal publishes articles on all aspects of animal world, including systematics, morphology, histology, cytology, ontogenetic, ecology, ecological physiology, zoogeography, protection and practical use of wildlife, etc. One of the journal's central tasks is to support and promote comprehensive interdisciplinary studies. It pays much attention to compiling an inventory and to preserving biodiversity, to the principles and methods of assessing and rational use of bioresources.

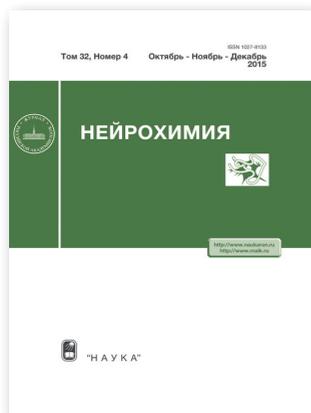

## Fiziologiya cheloveka (Human Physiology)

ISSN (print): 0131-1646  
 Founded in: 1975  
 Editor-in-Chief: RAS corresponding member A. Grigor'ev  
 Periodicity of issues: 6

The aim of the journal is to promote the integration of the theory, practice, methods, and investigations into human physiology. It carries articles on the functioning of the brain and brain disorders including mechanisms of the nervous system responsible for perception, learning, memorizing, experience of emotions and speech; discussion materials on such problems as respiration, blood circulation, circulatory system, motor functions, digestion as well as physiology of sport and labor.

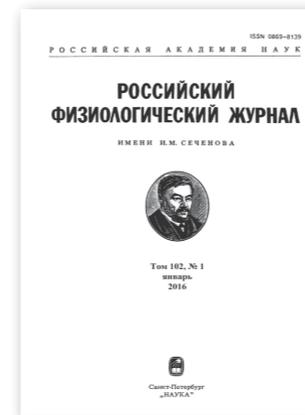

## Neyrokhimiya (Neurochemical Journal)

ISSN (print): 1027-8133  
 Founded in: 1982  
 Editor-in-Chief: M. Agadzhanov, N. Gulyaeva  
 Periodicity of issues: 4

The founders of the journal are the Russian Academy of Sciences and the National Academy of Sciences of the Republic of Armenia. It publishes works on medical and experimental neurochemistry, molecular neurobiology, nervous system biochemistry as well as materials on fundamental and applied aspects of neurochemistry.

## Rossiiskij fiziologicheskij zhurnal im. I. M. Sechenova (Russian Journal of Physiology/Sechenov Physiological Journal)

ISSN (print): 0869-8139  
 Founded in: 1917  
 Editor-in-Chief: RAS member N. Veselkin  
 Periodicity of issues: 12

Founded in 1917 on the initiative of Academician I. P. Pavlov. The journal publishes experimental, theoretical and overview articles on a wide range of physiology problems. Its sections include: neuroscience, general and integrative physiology, physiology of visceral, motor systems, clinical physiology, molecular and cell physiology.

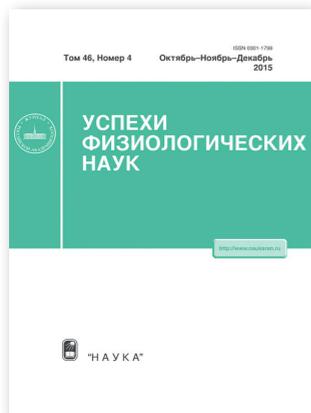

## Sensornye sistemy (Sensory Systems)

ISSN (print): 0235-0092  
 Founded in: 1987  
 Editor-in-Chief: RAS member M. Ostrovsky  
 Periodicity of issues: 4

The journal is a successor to the Academy of Sciences collections Problems of Physiological Optics and Problems of Physiological Acoustics (1941–1971) and the Sensory Systems yearbook (1977–1987). Most of the articles are interdisciplinary dealing with the main areas of fundamental research of sensory systems designed to reflect progress of diverse investigations in the field of sensory physiology, contribute to coordination and pooling of efforts of research teams in various specialties and stimulate interest in one of the most fascinating and important sections of the science of the brain.

## Uspekhi fiziologicheskikh nauk (Achievements of Physiology Sciences)

ISSN (print): 0301-1798  
 Founded in: 1970  
 Editor-in-Chief: L. Rosenshtraukh  
 Periodicity of issues: 4

The journal publishes reviews and critique on various departments of physiology as well as articles in which the authors, proceeding from available scientific literature, propose original concepts on fundamental theoretical issues backed up by their own experimental material. The journal is aimed at teachers and physiology specialists and medical and general biological biophysicists.

## Zhurnal vyshej nervnoj deyatel'nosti imeni I. P. Pavlova (Pavlov Journal of Higher Nervous Activity)

ISSN (print): 0044-4677  
 Founded in: 1951  
 Editor-in-Chief: RAS corresponding member P. Balaban  
 Periodicity of issues: 6

Carries the results of original theoretical and experimental research into the physiology and pathophysiology of higher nervous activity, general physiology of the brain and analyzers as well as reviews and critical papers, reports on scientific sessions and conferences. Particular attention is paid to articles dealing with the link between higher nervous activity and philosophy, psychology, pedagogy, and biology.

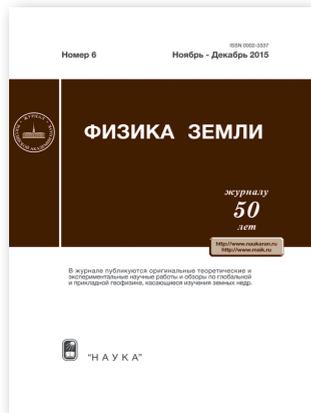

## Zhurnal evolyutsionnoj biokhimii i fiziologii (Journal of Evolutionary Biochemistry and Physiology)

ISSN (print): 0044-4529  
 Founded in: 1965  
 Editor-in-Chief: RAS member N. Veselkin  
 Periodicity of issues: 6

Founded in 1965, the journal publishes experimental, theoretical and review articles on various problems of evolutionary, comparative and ecological physiology, biochemistry, and morphology.

## Fizika zemli (Izvestiya, Physics of the Solid Earth)

ISSN (print): 0002-3337  
 Founded in: 1965  
 Editor-in-Chief: RAS corresponding member Yu. Morozov  
 Periodicity of issues: 6

The journal publishes original theoretical and experimental works and reviews on global and applied geophysics, including problems of the origin and evolution of the Earth, its inner structure, geodynamics, the Earth's physical fields, seismology, paleomagnetism, and magnetic properties of mountain rock, computer technologies and interpretation of geophysical data.

## Fundamental'naya i prikladnaya gidrofizika (Fundamental and Applied Hydrophysics)

ISSN (print): 2073-6673  
 Founded in: 2008  
 Editor-in-Chief: A. Rodionov, Ph.D.  
 Periodicity of issues: 4

The journal publishes the results of research in the following areas: fundamentals of hydrophysics; dynamics and hydrodynamics of marine objects; physical fields of marine objects, the ocean, atmosphere, and their interaction; methods and means of registering hydrophysical fields of the ocean and marine objects; information technologies in hydrophysical tasks, design, and operation of marine objects; ecology of the hydrosphere and hydrobionics.

## Geokologiya. Injenernaya geologiya. Gidrogeologiya. Geokriologiya (Environmental Geoscience)

ISSN (print): 0869-7803  
 Founded in: 1979  
 Editor-in-Chief: RAS member V. Osipov  
 Periodicity of issues: 6

The journal deals with the basic and applied aspects of today's most urgent issue – human-induced changes in the geoenvironment. Its principal objective is the effective solution of geoenvironmental problems involving conservation of the environment, development of its potential, and the improvement of human living conditions. The topics of the papers are: environmental changes under the effect of anthropogenic factors; contamination of ground and surface waters, soils, and rocks.

## Geokhimiya (Geochemistry International)

ISSN (print): 0016-7525  
 Founded in: 1956  
 Editor-in-Chief: RAS member E. Galimov  
 Periodicity of issues: 12

The journal is devoted to the problems of cosmochemistry, geochemistry of magmatic, metamorphic, hydrothermal and sedimentation processes; organic geochemistry; applied geochemistry and environmental chemistry.

## Geologiya rudnykh mestorozhdenij (Geology of Ore Deposits)

ISSN (print): 0016-7770  
 Founded in: 1959  
 Editor-in-Chief: RAS member N. Bortnikov  
 Periodicity of issues: 6

One of the few scientific periodicals devoted to deposits of ore and non-ore subsoil resources, conditions of their formation and regularities of spatial distribution, including the links between the processes of ore formation and deep structure of the Earth and various geodynamic situations; the fluid regime, sources of metals and fluids, age, physical-chemical parameters, isotope characteristics and geochemical circumstances of ore deposits; evolution of ore forming systems, radiology and radioecology.

## Geomorfologiya (Geomorphology)

ISSN (print): 0435-4281  
 Founded in: 1970  
 Editor-in-Chief: V. Chichagov, Ph.D.  
 Periodicity of issues: 4

The only scientific journal in Russia concerned with studies of the Earth's relief and relief-forming processes. It has been published for 45 years (since 1970). Its issues appear regularly 4 times a year and contain papers on various topics, such as studies of terrestrial, coastal and submarine landforms, geomorphological processes, ecological and applied geomorphology, and newly developed methods of research, as well as notes on history of the science and book reviews.

## Geotektonika (Geotectonics)

ISSN (print): 0016-853X  
 Founded in: 1965  
 Editor-in-Chief: RAS corresponding member K. Degtyarev  
 Periodicity of issues: 6

Materials devoted to general and regional tectonics, structural geology, geodynamics, experimental tectonics, including articles on the relationship between tectonics and the deep structure of the Earth, magmatism, metamorphism and minerals. It also carries reviews of articles and books, information on scientific events, new scientific publications and cartographic materials, new methods of tectonic research and processes of results obtained.

## Izvestiya RAN. Fizika atmosfery i okeana (Izvestiya, Atmospheric and Oceanic Physics)

ISSN (print): 0002-3515  
 Founded in: 1965  
 Editor-in-Chief: RAS member G. Golitsyn  
 Periodicity of issues: 6

The journal publishes original scientific research and review articles on vital issues in the physics of the Earth's atmosphere and hydrosphere and climate theory. The journal presents results of recent investigations of physical processes in the atmosphere and ocean that control climate, weather, and their changes. These investigations have possible practical applications.

## Izvestiya RAN. Seriya geograficheskaya (Izvestiya, Geographical Series/Regional Research of Russia)

ISSN (print): 0373-2444  
 Founded in: 1951  
 Editor-in-Chief: RAS member V. Kotlyakov  
 Periodicity of issues: 6

The journal contains scientific articles and reviews on topical problems of physical, socio-economic and political geography, ecological and geographical issues of nature use and nature conservation. The journal covers the activities of RAS institutes and other research institutions in the field of geography and nature conservation, the Russian Geographical Society and International Geographical Organizations.

## Litologiya i poleznye iskopaemye (Lithology and Mineral Resources)

ISSN (print): 0024-497X  
 Founded in: 1963  
 Editor-in-Chief: Yu. Gavrilov, Ph.D.  
 Periodicity of issues: 6

The journal publishes articles on a wide range of issues connected with the formation of sedimentary rock and ores. These include the main problems of lithological theory (types of lithogenesis, stages in the formation of sedimentary rock and ores, pattern of their distribution in the Earth's crust, evolution of the sedimentation process in the Earth history); mineralogy, geochemistry, and petrography of sedimentary rock and ores; problems of sedimentary and hydrothermal-sedimentary ore formation.

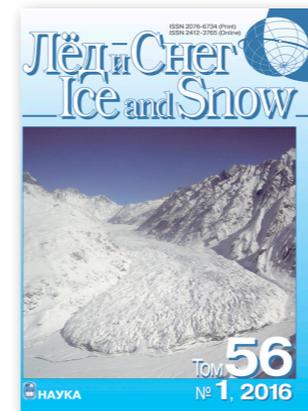

## Izvestiya russkogo geograficheskogo obschestva (The Russian Geographical Society Herald)

ISSN (print): 0869-6071  
 Founded in: 1865  
 Editor-in-Chief: V. Razumovsky, Ph.D.  
 Periodicity of issues: 6

The journal covers current and controversial, theoretical and applied problems of modern geography and related sciences. Particular attention is paid to articles on major national economic problems related to spatial organization of the economy and regional development, rational use of natural resources and preservation of natural diversity. The body of contributors is constantly expanding as leading scientists and practical workers from geography-related sectors join in.

## Lyod i sneg (Ice and Snow)

ISSN (print): 2076-6734  
 Founded in: 1964  
 Editor-in-Chief: RAS member V. Kotlyakov  
 Periodicity of issues: 4

A professional academic periodical in the field of Earth glaciology and cryology. The topics span all areas of glaciology, including the study of atmospheric ice, the snow cover and avalanches, mountain glaciers and polar ice cover, marine, river, lake, and underground ice, glacial mudflows, flood ice as well as past icing of the Earth and possible cooling in the future. The topics also have an applied element covering the processes of icing, snowstorms and drifts, shifts of pulsating glaciers and ice melting.

## Okeanologiya (Oceanology)

ISSN (print): 0030-1574  
 Founded in: 1961  
 Editor-in-Chief: RAS member R. Nigmatulin  
 Periodicity of issues: 6

Founded in 1961 as a multidisciplinary journal in the field of marine sciences. Publishes original results of theoretical and experimental research in physical oceanology, marine hydrochemistry, bio-oceanology and hydrobiology, marine geology, new methods and technical means of exploring the ocean and information on scientific expeditions.

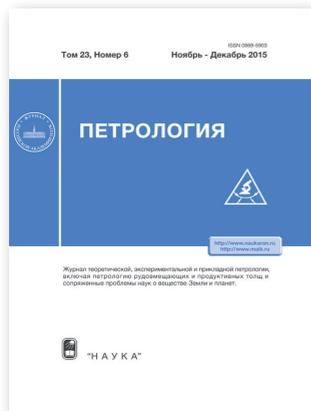

## Stratigrafiya. Geologicheskaya korrelyatsiya (Stratigraphy and Geological Correlation)

ISSN (print): 0869-592X  
 Founded in: 1993  
 Editor-in-Chief: RAS member M. Semikhatov  
 Periodicity of issues: 6

The only journal that provides comprehensive coverage of the fundamental and applied aspects of stratigraphy and the correlation of geologic events and processes in time and space. Articles are based on the results of multidisciplinary studies and are for researchers, university professors, students, and geologists interested in stratigraphy and the chronological features of the world's geological record.

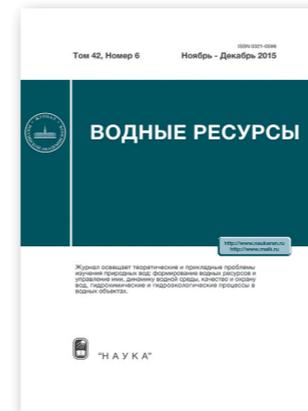

## Petrologiya (Petrology)

ISSN (print): 0869-5903  
 Founded in: 1993  
 Editor-in-Chief: RAS member O. Bogatkov  
 Periodicity of issues: 6

The journal publishes original works on petrology, geochemistry and mineralogy of magmatic, metamorphic and metasomatic rock of continents and oceans, experimental research, geothermobarometry, physical-chemical analysis of mineral parageneses, evolution of endogenous processes, isotopic geochemistry and geochronology of crystalline rock and related problems of the substance of the Earth and planets.

## Vodnye resursy (Water Resources)

ISSN (print): 0321-0596  
 Founded in: 1972
